Insights

Seasonal and Trend-Based Churn Patterns: The line chart of churn rate by month reveal seasonal patterns or specific times of the year when churn rates spike, indicating periods where targeted retention efforts could be most beneficial

Lease Term Preferences and Their impact on Retention:

The frequency distribution of lease terms highlights tenant preferences, showing whether shorter or longer leases correlate with higher retention rates, suggesting adjustments to lease offerings.

Financial Efficiency and its role in overall property performance:

Rent collection performance insights can highlight operational efficiencies or issues affecting the company's financial health and its ability to invest in property improvements and tenant services

Effectiveness of Renewal Strategies Over Time: The comparison of renewed versus expired lease over time can indicate the success of recent retention strategies or highlight the need for new approaches

Recommendations

Implement Targeted Retention Programs: Based on identified churn patterns , develop targeted retention programs during high-risk periods, such as personalised communication, special offers, or community events to engage tenants.

Adjust Lease Terms to meet Tenant Preferences: If certain lease term correlate with higher retention, consider offering more flexible or preferred lease terms to new and renewing tenants to encourage longer stays

Enhance Tenant Satisfaction: Prioritise improvements in areas directly impacting tenant satisfaction, as identified through survey responses. This could include property amenities, maintenance responsiveness and community building efforts.

Optimize Financial Operations: Address any identified inefficiencies in net collection to improve financial stability. Consider implementing technology solutions for easier payment process or offering incentives for on-time payments.

Refine renewal Strategies: Analyse any identified ineffectiveness of the lease renewal strategies and adjust based on what has been most successful. This might invoke early renewal incentives, transparent communication about lease terms , or personalised renewal experiences.

Leverage Data for Continuous improvement: Use the insights from the Power Bi dashboard regularly to make data-driven decisions. This Dashboard should be a living tool, with data and insights reviewed regularly to identify trends, adjusts strategy, and continuously improve tenant retention efforts
